PROFESSIONAL PROFILE

Fullstack Software Engineer with 3+ years of hands-on experience building authenticated web applications, mobile-ready product flows, APIs, dashboards, ecommerce systems, and data-driven SaaS products. Founder of StephisCode, a freelance software company operated for 3+ years, with end-to-end ownership across product planning, interface design, frontend engineering, backend architecture, database workflows, testing, deployment, and product refinement.

3+ years	3+ years	Fullstack
software engineering	freelancing through StephisCode	web, mobile, backend and product UI

CORE TECHNICAL STRENGTHS

FRONTEND & MOBILE React, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, responsive UI and reusable component systems.	BACKEND & AUTH Node.js, Express, Next.js API routes, REST APIs, Prisma, PostgreSQL, bcrypt, JWT/cookie sessions and protected workflows.
PRODUCT SYSTEMS SaaS dashboards, ecommerce, analytics, transactions, bills, catalogues, cart and wishlist flows, PWA and product design.	TOOLS & DELIVERY Git, Postman, Vercel, Recharts, Zustand, Zod, Resend, ESLint, debugging, deployment checks and SEO-aware delivery.

PROFESSIONAL EXPERIENCE

Founder & Fullstack Software Engineer

May 2024 - Present

StephisCode | Freelance Software Company | Lagos / Remote

- Own product discovery, UX direction, frontend implementation, backend architecture, database design, deployment, and post-launch refinement for client and independent builds.
- Build responsive, production-minded applications with reusable interfaces, secure authentication, protected dashboards, API integrations, and database-backed product behavior.
- Translate business goals and real user problems into clear product flows across finance, ecommerce, SaaS, and mobile-ready experiences.
- Manage scope, communicate progress, debug across the stack, and prepare releases with performance, accessibility, SEO, and maintainability in view.

Fullstack Software Engineer / Product Builder

2023 - Present

Independent Engineering Practice

- Built a broad engineering foundation across React and Next.js interfaces, Node.js services, API routes, authentication, PostgreSQL data models, and deployment workflows.
- Developed end-to-end product habits: map user journeys, define data contracts, handle loading and error states, test responsive behavior, and ship maintainable releases.
- Strengthened practical delivery through repeated fullstack builds, Git-based iteration, debugging, environment management, and real-world product refinement.

SELECTED FULLSTACK PROJECTS

TrackMoni

www.trackmoni.online

Personal finance platform and installable PWA

Stack: Next.js, TypeScript, Prisma, PostgreSQL, bcrypt, JWT, Recharts, Zod, next-pwa

- Built an authenticated finance platform for tracking income, expenses, transaction history, bills, reminders, notifications, summaries, and financial analytics.
- Engineered account flows for signup, email verification, login, password recovery, protected dashboards, secure cookies, and user-owned financial records.
- Created typed API routes and PostgreSQL models for users, transactions, bills, notifications, verification, and password reset workflows.
- Added Recharts insights, advanced summaries, PIN privacy protection, mobile navigation, and installable PWA support for an app-like experience.

TheePlugg

Fullstack ecommerce beauty and makeup store

Stack: Next.js, TypeScript, Prisma, PostgreSQL, bcrypt, Zustand, Tailwind CSS, Resend

- Built a premium ecommerce experience for makeup, beauty accessories, and lashes with product, category, brand, cart, wishlist, checkout, profile, and support journeys.
- Implemented customer registration, login, logout, password recovery, session-aware profile access, protected account flows, and role-based user data.
- Developed a private admin workspace for catalogue and store-content management using Prisma-backed products, inventory fields, featured states, and reusable API routes.
- Created responsive shopping interactions with Zustand state, product variants and shades, stock-aware cart controls, and email-based customer support workflows.

TRAINING

Fullstack Web Development Training

Aug 2022 - Feb 2023

The App Brewery

- Completed structured practical training in HTML, CSS, JavaScript, React, Node.js, Express, REST APIs, Git, responsive design, and fullstack application development.

ENGINEERING APPROACH

PRODUCT THINKING	SYSTEM DESIGN	DELIVERY
Start with the user problem, simplify the journey, and build the smallest clear version that creates value.	Connect interface decisions to APIs, authentication, data ownership, validation, and maintainable models.	Ship responsive releases, verify real workflows, study failures, and refine the product after launch.
