3+ yrs	2+ yrs	Fullstack
software engineering	freelancing via StephisCode	web, mobile, backend

PROFESSIONAL PROFILE

Fullstack Software Engineer with 3+ years of hands-on experience building modern web applications, mobile-ready product flows, authenticated platforms, APIs, dashboards, and data-driven systems. Founder of StephisCode, a freelance software company through which I have delivered polished client-ready and production-minded products for about 2 years. Strong across React, React Native, Next.js, TypeScript, Node.js, Prisma, PostgreSQL, REST APIs, authentication, UI systems, and deployment.

CORE TECHNICAL STRENGTHS

Frontend & Mobile	React, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, responsive UI, component systems, mobile-first layouts.
Backend & Auth	Node.js, Express/Next API routes, REST APIs, Prisma, PostgreSQL, bcrypt, JWT/cookie sessions, protected routes, admin access, auth-aware workflows.
Product Systems	E-commerce flows, dashboards, analytics, transaction history, cart/wishlist/profile flows, support forms, SEO-aware pages, PWA thinking.
Tools & Delivery	Git, Postman, Vercel, Cloudinary, Recharts, Zustand, Zod, ESLint, debugging, deployment checks, maintainable folder structure.

PROFESSIONAL EXPERIENCE

Founder & Fullstack Software Engineer May 2024 - Present
StephisCode | Freelance Software Company

- Run StephisCode as a freelance software company, owning product planning, interface design, frontend engineering, backend logic, API integration, deployment, and post-build refinement.
- Build fullstack applications with clean user flows, reusable components, secure authentication, protected dashboards, database-backed features, and responsive UI that works across mobile and desktop.
- Deliver products across e-commerce, finance, education, productivity, and business websites, translating real user needs into working product experiences instead of static pages.
- Communicate scope, iterate quickly, debug issues, and prepare projects for live usage with professional polish, SEO awareness, and maintainable code structure.

Fullstack Software Engineer / Product Builder 2023 - Present
Independent Engineering Practice

- Built and refined a 3-year engineering foundation across frontend, backend, product UI, API routes, authentication, database-backed workflows, and deployment-focused software delivery.
- Practiced end-to-end engineering through repeated product builds: mapping user flows, designing responsive screens, building data contracts, integrating APIs, and shipping usable applications.
- Strengthened production habits around Git workflows, debugging, environment variables, form handling, state management, error states, accessibility basics, and code organization.

TRAINING

Fullstack Web Development Training Aug 2024 - Feb 2025
The App Brewery

- Completed structured training in HTML, CSS, JavaScript, React, Node.js, Express, REST APIs, Git, responsive design, and practical fullstack application development.

SELECTED FULLSTACK PROJECTS

TheePlugg

E-commerce makeup selling website with full authentication | Next.js, TypeScript, Prisma, bcrypt, Cloudinary, Zustand, Tailwind CSS

theeplugg.com

- Built a premium online beauty store for makeup, accessories, and lashes with category pages, brand pages, product detail views, cart, wishlist, profile, and support flows.
- Implemented full customer authentication with register, login, logout, session-aware profile access, auth refresh, and protected account flows.
- Added admin authentication routes and a private admin workspace pattern for managing store operations and product-related workflows.
- Structured the platform with Next API routes, Prisma-backed data access, reusable UI sections, Cloudinary-ready media handling, and state management for shopping interactions.

TrackMoni

Authenticated personal finance platform and dashboard | Next.js, TypeScript, Prisma, bcrypt/JWT, Recharts, Zod, next-pwa
www.trackmoni.online

- Built a finance dashboard for tracking income, expenses, transactions, bills, summaries, notifications, and analytics from an authenticated user account.
- Created backend API routes for login, signup, verification, password reset, transaction history, recent transactions, bill reminders, dashboard insights, and analytics.
- Designed data-driven UI with charted financial insights, advanced summary views, PWA support, and typed validation for more reliable finance workflows.
- Focused on secure user ownership of data, protected routes, auth cookies, database-backed transactions, and clear money-management UX.

Quint Dynamics Trading Academy

Forex education academy reboot | React, Tailwind CSS, responsive brand UI, SEO-aware content structure

www.quintdynamicsacademy.com

- Rebuilt the academy website around a premium learning experience for Forex education, mentorship positioning, course clarity, and a stronger brand system.
- Improved responsive layout, visual hierarchy, call-to-action flow, domain-ready presentation, and SEO-aware page structure for a professional education platform.
- Balanced business goals with interface polish so the academy feels credible, easy to scan, and ready for student conversion.

DoQueue

Task workflow application | React, JavaScript, CSS, Vercel

do-queue-steel.vercel.app

- Built a task management interface focused on helping users organize priorities, move through daily work, and keep task interactions fast and readable.
- Created responsive product UI patterns, focused states, and deployment-ready frontend structure for a simple productivity workflow.

ADDITIONAL PRODUCT WORK

FuelUpRight - nutrition-focused web platform with meal plans, BMI tooling, and health tips. **Blissbuy / Bliss-Store** - e-commerce interfaces with product filtering, API integration, and modern product browsing. **Portfolio systems** - personal branding, SEO metadata, responsive UI, project pages, contact flows, and deployable frontend architecture.

PROFESSIONAL FIT

Strong fit for fullstack software engineering, frontend engineering, React/Next.js roles, React Native mobile app work, dashboard products, authenticated platforms, API integration, and freelance/client product delivery.
